

## American Airlines

New Terminal Building  
JFK Airport

With a traveler capacity of 12.8 million passengers a year, fireproofing was a critical concern for American Airlines after the new terminal at John F. Kennedy International Airport was built. Awarded the task of fireproof painting the towering structural columns and sizable trusses throughout the \$1.3 billion terminal, we ensured that this state-of-the-art structure would be virtually flame proof.

Contractor: VRH/Torcon

Duration: Five Years
